

**Your body is made up of trillions of cells, too small**

**to see, even with a microscope!**

**Inside these tiny cells are**

**23 pairs of chromosomes,**

that make you the person you are. The information in your chromosomes

determines your hair  color,

your eye  color, how you **grow**,

and all of the other things that you can do.

**People with**

**Cri du Chat Syndrome**

**are missing a small part of**

**Chromosome 5.**

*It sometimes makes it tricky for them to do things, and it might take a little longer for them to learn to walk and talk.*

😊 Sometimes, they might need your help.😊

**Cri Du Chat**

**Awareness Week 2020**

**May 1-10, 2020**
